

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	25 June 2026
Team ID	
Project Name	An employee requests installation of licensed software through the Service Catalog
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming was conducted to identify an efficient solution for managing software installation requests. The team discussed issues in the manual request process, such as approval delays, poor tracking, and communication gaps. Various ServiceNow features, including the Service Catalog, Workflow, Business Rules, and Catalog Tasks, were considered.

After evaluating different ideas based on feasibility and business value, the team selected a **Software Installation Request Automation System**. The solution enables employees to submit software requests through the Service Catalog, automates approvals and task creation, and improves request tracking, efficiency, and user experience.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

PROJECT TITLE Software Installation Request Automation using ServiceNow TEAM MEMBERS<table border="1" style="width: 100%; border-collapse: collapse;"><thead><tr><th>Member</th><th>Responsibility</th></tr></thead><tbody><tr><td>Harshini S</td><td>Workflow Design & Development</td></tr><tr><td>Team Member 2</td><td>Service Catalog & Variables</td></tr><tr><td>Team Member 3</td><td>Testing & Documentation</td></tr></tbody></table> OBJECTIVE Design an automated ServiceNow solution that allows employees to request software easily, managers to approve efficiently, and IT teams to fulfill requests with minimal manual effort.	Member	Responsibility	Harshini S	Workflow Design & Development	Team Member 2	Service Catalog & Variables	Team Member 3	Testing & Documentation	EXISTING PROBLEM - Software requests are made through emails or phone calls. - Delayed approvals and manual follow-ups. - Manual task assignment to IT team. - Poor tracking and lack of transparency. - Increased workload for IT administrators. HOW MIGHT WE STATEMENT "How might we automate the software installation request process using ServiceNow so that employees can submit requests easily, managers can approve them efficiently, and IT teams can fulfill requests with minimal manual effort?"
Member	Responsibility								
Harshini S	Workflow Design & Development								
Team Member 2	Service Catalog & Variables								
Team Member 3	Testing & Documentation								

Step-2: Brainstorm, Idea Listing and Grouping

Step-3: Idea Prioritization

Shortlisted ideas were evaluated based on two factors:

- Importance
- Feasibility

PRIORITIZATION MATRIX					
No.	Idea	Importance (1 – Low, 5 – High)	Feasibility (1 – Low, 5 – High)	Priority (Score)	Priority Level
1	Service Catalog Request	5	5	25	★★★★★
2	Flow Designer Approval	5	5	25	★★★★★
3	Catalog Task Automation	5	5	25	★★★★★
4	Business Rule for Incident Creation	5	3	15	★★★★☆
5	Email Notifications	3	5	15	★★★★☆
6	Reporting Dashboard	3	3	9	★★★☆☆
7	Software License Integration	5	2	10	★★★☆☆
8	AI Recommendation Engine	3	1	3	★★☆☆☆

FINAL SELECTED FEATURES

- ✓ Software Installation Request Catalog Item
- ✓ Variable Configuration
- ✓ Approval Workflow
- ✓ Automatic Catalog Task Creation
- ✓ Assignment to Software Support Team
- ✓ Business Rule for License Issues
- ✓ Request Tracking
- ✓ Update Set Deployment

OUTCOME OF IDEATION PHASE

The brainstorming session helped identify the best approach for automating software installation requests. ServiceNow's Service Catalog, Flow Designer, Business Rules, and Catalog Tasks were selected as the core technologies because they provide an efficient, scalable, and user-friendly solution for managing software requests from submission through approval, fulfillment, and closure.
