

Project Design Phase
Proposed Solution Template

Date	25 June 2026
Team ID	
Project Name	An employee requests installation of licensed software through the Service Catalog
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Employees face delays and lack visibility when requesting licensed software through manual approval and installation processes.
2.	Idea / Solution description	Develop a ServiceNow-based Software Installation Request System using Service Catalog, Workflows, Business Rules, and Flow Designer to automate request submission, approval, task creation, and tracking.
3.	Novelty / Uniqueness	Provides end-to-end automation with dynamic approvals, automatic catalog task generation, real-time request tracking, and incident creation for license shortages.
4.	Social Impact / Customer Satisfaction	Reduces request processing time, improves user experience, ensures transparency, and increases employee satisfaction through a self-service portal.
5.	Business Model (Revenue Model)	Enterprise IT Service Management solution that improves operational efficiency, reduces manual effort, and lowers software management costs.
6.	Scalability of the Solution	Easily scalable to support additional IT services such as hardware requests, software upgrades, access requests, and asset management across multiple departments.
